PERSPECTIVE

Industrialization occupies very important position in meeting the basic human needs and desires. To make workplace comfortable and productive, the harmful exposures need to be evaluated and controlled by using a variety of techniques. Asbestos and silica may generate during various workplace activity/operation. To identify workplace exposure, we need knowledge, skill and competence on Safety and Industrial Hygiene Techniques. This can be achieved by identifying environmental aspects, legislative requirements and establishing a structured program for the safe environment of the workmen.

With this objective, a three days training workshop on " Management of Work Environment Hazards in Chemical Industry" is being organized at the Central Labour Institute, Mumbai from 14th to 16th March, 2018 would provide a practical guidance to the working personnel and develop knowledge and skills among them.
